

Deepak Gupta

Hello.

PROFILE

A Full Stack Developer with experience working at corporates, startups and as a consultant. Seeking to serve a company whose vision makes me nervous and this world a better place.

EXPERIENCE

FULL STACK DEVELOPER, PIQUOR TECHNOLOGIES; GURGAON, INDIA

NOVEMBER 2015-PRESENT

RepUp is a Piquor product to help hoteliers manage online reputation. Currently working in a team of 4, usually accompanied by consultants. Learnt a lot from Kapil Verma, former CTO, who taught me to code less and think more, helped me shape my thought process & engraved my neurological pathways to ship.

Duties & Responsibilities

1. PRODUCT & PROJECT MANAGEMENT

- Work with management to determine the needs to maximise customer interest.
- Develop workflows and procedures to *incorporate new technologies* to the existing stack.
- Revise and rebuild existing products to improve developer and user experience.

2. DEVELOPMENT

- Build core *APIs* to power the platform using **Node.js**, **Express.js**, **Postgres SQL** & **Redis**.
- Build the *distributed crawling* architecture required to fetch data from more than 12 sources using **Node.js**.
- Build *automated notification* systems (push, email and on platform) using **Amazon SES**, **Amazon SNS** and **Google Push**.
- Build *infrastructure* automation for continuous deployment on **AWS EC2** clusters using Shell (**bash**), Linux, **AWS RDS**.
- Build Admin Dashboard and ORM Dashboard in **React.js**.
- Build *Android and iOS* apps using Facebook's **React Native**.
- Build a NLP(Natural language Processing) system in **Node.js**.

3. BUSINESS ANALYTICS

- Analyse hotel industry trends, satisfaction factors and operating efficiency using SQL and Excel.
- Use available data to develop a Maturity Model which gauges hotels on industry standards and suggests ways to improve.

4. CROSS DEPARTMENT COMMUNICATION

- Comfortable in communicating with sales team to understand customer pain points and help development team to solve them.
- Schedule and conduct interviews with human resources team, to onboard new developers.

INDEPENDENT CONSULTANT, SITIO; REMOTE

MARCH 2016

Sitio is a startup that helps people share, tag and add reviews about a location using their Android and iOS apps.

Duties & Responsibilities

1. PRODUCT & PROJECT MANAGEMENT

- Understanding client requirements and proposing best solutions.

2. DEVELOPMENT

- Developed android and iOS apps using **React Native**.
- Implemented **Google Maps** api.

INDEPENDENT CONSULTANT, HIRY APP; REMOTE

DECEMBER 2015 - JANUARY 2016

HIRY helps multi national companies to automate their hiring processes using an App based solution. The vision was to make the HR process painless for both job seeker and job provider. Worked to provide end to end solutions.

Duties & Responsibilities

1. PRODUCT & PROJECT MANAGEMENT

- Understanding client requirements and proposing best solutions.

2. DEVELOPMENT

- Developed android and iOS apps using **React Native**.
- Developed backed APIs using **Node.js**
- Setup Infrastructure on AWS using **SES, EC2** and **RDS**.

FRONT END DEVELOPER, FRANKLY.ME; NOIDA, INDIA

APRIL 2015-OCTOBER 2015

Frankly was a video sharing platform that helped connect politicians, celebrities and industry leaders to there fans using video selfies (velfies). Worked in a development team of 15 members. This team was the best brains of all I've ever come across.

Duties & Responsibilities

1. DEVELOPMENT

- Developed a *notification system* using **Python** on the backend and **Node.js + EJS** on the frontend.
- Worked closely with marketing team on college products, a fork of the original app line, designed specifically to create and share videos on the spot using **Python** and **Node.js**.
- Helped develop a *video buffering* module using **Node.js**.

2. CROSS DEPARTMENT COMMUNICATION

- Communicate with marketing team to ensure the product line, assigned to me, was functional as expected before campaigns.

SOFTWARE ENGINEER, ACCENTURE; GURGAON, INDIA

OCTOBER 2014-MARCH 2015

Worked on an Accenture internal project project to automate the manual work that was done in case of any issue in the Accenture ecosystem, like welding, electrical, risk-assessment, heights etc. For every issue a dynamic series of web pages or forms were generated as per the roles, categories and approval levels

Duties & Responsibilities

DEVELOPMENT

- Web page development for admin role generation, category generation, role mapping, template generation and approvals levels.
- Work flow, contractor form generation on user level.
- Helped develop signature pad modules and
- Authentication using **ASP .net, MVC4, javascript, css, html, Entity Framework and Sql Server.**

INDEPENDENT CONSULTANT, OST LABZ PRIVATE LIMITED; NEW DELHI

MAY 2014- JULY 2014

OST Labz is a hardware and pub consultancy firm based out of New Delhi. I worked with them on an android project that helps control robots using android devices and motion gesture control.

Duties & Responsibilities

DEVELOPMENT

- Developed android app using **Google SDK** and **Java**.
- Developed **motion mapping** algorithm to map gestures to robot commands.
- Developed Bluetooth based **communication sockets**.
